THIS IS UNEVALUATED INFORMATION

1. An underground plant of undetermined purpose is under construction between the communities of Horni Pocernice and Bechovice. The construction of the plant was begun at the end of 1949. The entire area of the construction is surrounded by forest. The brick building built beside the road serves as offices for the foreman, quarters for workers and as a storehouse for building materials.
2. During May 1951 electric transformers were brought into the area. These transformers had to be unloaded in front of the entrance to the area, because drivers were not allowed to enter the area of the future factory. (Access to the area of the future factory is strictly forbidden). The construction of the underground plant is still in progress.
